CONTENTS OF VOLUME 145

Number 1, January 1994

Selective Catalytic Reduction of NO with Methane on Gallium Catalysts	Yuejin Li and John N. Armor	1
Measurement of Surface Acidity by ^{31}P NMR of Adsorbed Trimethylphosphine: Application to Vapor Deposited SiO_2 on Al_2O_3 Monolayer Catalysts	Tai-Cheng Sheng and Ian D. Gay	10
Site Suppression and Pore Choking in the Deactivation of Nickel–Molybdenum Coal-Liquid Hydrotreatment Catalyst	Dady B. Dadyburjor and Ajoy P. Raje	16
Orthophosphoric Acid Interactions with Ultrastable Zeolite Y: Infrared and NMR Studies	A. Corma, V. Fornés, W. Kolodziejski, and L. J. Martínez-Triguero	27
The Chemistry of Acetates on the Rh(111) Surface	C. J. Houtman, N. F. Brown, and M. A. Barteau	37
A Test Method for Quantitative Characterization of Zeolite Hydrogen Transfer Activity	D. B. Lukyanov	54
Kinetics of the Catalytic Cracking of Paraffins at Very Short Times on Stream	Avelino Corma, Pable J. Miguel, and Antonio V. Orchillés	58
Coupling of Oxidative Dehydrogenation and Aromatization Reactions of Butane	Wen-Qing Xu and Steven L. Suib	65
Synthesis, Characterization, and Catalytic Properties of Metallo–Titanium Silicate Molecular Sieves with MEL Topology	J. Sudhakar Reddy, Rajiv Kumar, and Sigmund M. Csicsery	73
Transformation of *m*-Xylene over Al-Pillared Clays and Ultrastable Zeolite Y	R. Molina, A. Schutz, and G. Poncelet	79
Conversion of Light Alkanes into Aromatic Hydrocarbons. VII. Aromatization of Propane on Gallosilicates: Effect of Calcination in Dry Air	G. Giannetto, A. Montes, N. S. Gnep, A. Florentino, P. Cartraud, and M. Guisnet	86
Study of the NO_2–NH_3 Interaction on a Titania (ANATASE) Supported Vanadia Catalyst	Margarita Kantcheva, Vladimir Bushev, and Dimitar Klissurski	96
Fluoride and Sulfate Treatment of $AlPO_4$–Al_2O_3 Catalysts. I. Structure, Texture, Surface Acidity, and Catalytic Performance in Cyclohexene Conversion and Cumene Cracking	F. M. Bautista, J. M. Campelo, A. Garcia, D. Luna, J. M. Marinas, A. A. Romero, J. A. Navio, and M. Macias	107
Conversion of Synthesis Gas to Isobutylene over Zirconium Dioxide Based Catalysts	Walter S. Postula, Zhentao Feng, C. V. Philip, Aydin Akgerman, and Rayford G. Anthony	126
Structure Characterization of Platinum/Alumina, Rhenium/Alumina, and Platinum–Rhenium/Alumina Catalysts	Chen Laiyuan, Ni Yueqin, Zang Jingling, Lin Liwu, Luo Xihui, and Cheng Sen	132
Chromia Supported on Titania. II. Morphological Properties and Catalytic Behavior in the Selective Reduction of Nitric Oxide by Ammonia	J. Engweiler, J. Nickl, A. Baiker, K. Köhler, C. W. Schläpfer, and A. von Zelewsky	141
Activity of Ti-Beta Catalyst for the Selective Oxidation of Alkenes and Alkanes	A. Corma, M. A. Camblor, P. Esteve, A. Martínez, and J. Pérez-Pariente	151

22 731HI XL 9/94 31249-152 2087

Polarized Total-Reflection Fluorescence EXAFS Study of Anisotropic Structure Analysis for Co Oxides on α-Al_2O_3 (0001) as Model Surfaces for Active Oxidation Catalysts	Masayuki Shirai, Tomoya Inoue, Hiroshi Onishi, Kiyotaka Asakura, and Yasuhiro Iwasawa	**159**
Selective α-Monomethylation of Phenylacetonitrile with Dimethyl Carbonate or Methanol over Alkali-Exchanged Faujasites	Zi-Hua Fu and Yoshio Ono	**166**
The Role of Reaction Temperature and Cracking Catalyst Characteristics in Determining the Relative Rates of Protolytic Cracking, Chain Propagation, and Hydrogen Transfer	Avelino Corma, Pablo J. Miguel, and Antonio V. Orchillés	**171**
Zeolite Effects on the Cracking of Long Chain Alkyl Aromatics	A. Corma, P. J. Miguel, A. V. Orchillés, and Gerald Koermer	**181**
The Catalytic Oxidation of Ammonia in a Ceramic Electrochemical Reactor, Using Metal Oxide Electrodes	N. M. Sammes and B. C. H. Steele	**187**
La–Eu Cuprates as Catalysts for Phenol Oxidation	Lucio Forni, Cesare Oliva, Anatoli V. Vishniakov, Alexei M. Ezerets, Ivan E. Mukovozov, Francesco P. Vatti, and Vera N. Zubkovskaja	**194**
Activity and Selectivity of Supported Rh Catalysts for Oxidative Carbonylation of Aniline	K. Venkatesh Prasad and R. V. Chaudhari	**204**
Sulfur Exchange Studies on a Mo/Al_2O_3 Catalyst	F. E. Massoth and P. Zeuthen	**216**
Catalytic Oxidative Decomposition of Dimethyl Methylphosphonate over Cu-Substituted Hydroxyapatite	Kwan Young Lee, Marwan Houalla, David M. Hercules, and W. Keith Hall	**223**
Notes		
Role of Vanadium Promoter in Rh-V/SiO_2 Catalysts for the Synthesis of C_2-Oxygenates from Syngas	Hongyuan Luo, Huanwen Zhou, Liwu Lin, Dongbai Liang, Can Li, Dan Fu, and Qin Xin	**232**
XPS Evidence of Alloying in Pd/ZnO Catalysts	Zoltán Zsoldos, Antal Sárkány, and László Guczi	**235**
A FTIR Study of Surface Nucleophilicity of TiO_2 and MoO_3/TiO_2 Doped with Alkaline Cations	C. Martín, I. Martín, and V. Rives	**239**
Shape-Selectivity of Large and Small Crystals of Zeolite ZSM-5	Klaus Beschmann, Lothar Riekert, and Ulrich Müller	**243**
Decomposition of Ketene over Supported Rhodium	T. H. Fang and S. D. Worley	**246**

Number 2, February 1994

A Study by ^{31}P NMR Spin Echo Mapping of VPO Catalysts. I. Characterization of the Reference Phases	M. T. Sananes, A. Tuel, and J. C. Volta	**251**
On the Mechanism of *n*-Butane Oxidation to Maleic Anhydride on VPO Catalysts. I. A Kinetics Study on a VPO Catalyst as Compared to VPO Reference Phases	Y. Zhang-Lin, M. Forissier, R. P. Sneeden, J. C. Védrine, and J. C. Volta	**256**
On the Mechanism of *n*-Butane Oxidation to Maleic Anhydride on VPO Catalysts. II. Study of the Evolution of the VPO Catalysts under *n*-Butane, Butadiene, and Furan Oxidation Conditions	Y. Zhang-Lin, M. Forissier, J. C. Védrine, and J. C. Volta	**267**

Effect of Thermal Treatments on the Properties of Nickel and Cobalt Activated-Charcoal-Supported Catalysts	L. M. Gandia and M. Montes	**276**
An Electrochemical Membrane Reactor for Selective Hydrogenation of Acetylene in Abundant Ethylene	Kiyoshi Otsuka and Toshikazu Yagi	**289**
Surface Carbonaceous Deposits as Activity and Selectivity Influencing Species in Ring-Opening Reactions of Propylcyclobutane Catalyzed by Pt/SiO_2	Béla Török, Árpád Molnár, István Pálinkó, and Mihály Bartók	**295**
Influence of Precursors Used in Preparation of MgO on Its Surface Properties and Catalytic Activity in Oxidative Coupling of Methane	V. R. Choudhary, V. H. Rane, and R. V. Gadre	**300**
Conductivity and Phase Diagram of the SO_2 Oxidation Catalyst Model System: $M_2S_2O_7$–V_2O_5 (M = 80% K + 20% Na)	D. A. Karydis, S. Boghosian, and R. Fehrmann	**312**
Oxidative Dehydrogenation of Propane on γ-Al_2O_3 Supported Vanadium Oxides	J. G. Eon, R. Olier, and J. C. Volta	**318**
Catalytic Properties of $RhCl_3 \cdot 3H_2O$ Immobilized on the Modified Poly(styrene–divinylbenzene) Copolymer in Aqueous Phase Hydroformylation of Propylene	Ki Su Ro and Seong Ihl Woo	**327**
Catalytic NH_3 Decomposition by Topotactic Molybdenum Oxides and Nitrides: Effect on Temperature Programmed γ-Mo_2N Synthesis	R. S. Wise and E. J. Markel	**335**
Synthesis of High Surface Area Molybdenum Nitride in Mixtures of Nitrogen and Hydorgen	R. S. Wise and E. J. Markel	**344**
Active Surface of γ-Al_2O_3–Supported Co_3O_4	Penka G. Dimitrova and Dimiter R. Mehandjiev	**356**
Magnetite Formation on Silica and Alumina	Maria do Carmo Rangel and Fernando Galembeck	**364**
Heterogeneity of OH Groups in Faujasites Studied by IR Spectroscopy	J. Datka and B. Gil	**372**
Chemical Vapor Deposition of Platinum Hexafluoroacetylacetonate inside KL Zeolite: A New Route to Nonacidic Platinum-in-Zeolite Catalysts	Carlo Dossi, Rinaldo Psaro, Andrea Bartsch, Achille Fusi, Laura Sordelli, Renato Ugo, Maurizio Bellatreccia, Roberto Zanoni, and Gilberto Vlaic	**377**
Oxygen Species on the Surface of La_2O_3/CaO and Its Role in the Oxidative Coupling of Methane	Tinglu Yang, Liangbo Feng, and Shikong Shen	**384**
Synergistic Effects of Superbasic Catalysts on the Selective Formation of Acrylonitriie via Oxidative Methylation of Acetonitrile with Methane	Eli Ruckenstein and Ashraf Z. Khan	**390**
Stable Nickel-Containing Catalysts for the Oxidative Coupling of Methane	Kerry M. Dooley, Shang-Yang Chen, and J. R. H. Ross	**402**
The Reconstruction of Supported Platinum Particles Monitored by Methylcyclohexane Dehydrogenation and H_2 TPD	Alain Rochefort, Fabienne Le Peltier, and Jean-Paul Boitiaux	**409**
On the Nature and Formation of the Active Sites in Re_2O_7 Metathesis Catalysts Supported on Borated Alumina	M. Sibeijn, J. A. R. van Veen, A. Bliek, and J. A. Moulijn	**416**

Catalytic Properties of a $CoMo/Al_2O_3$ Catalyst Presulfided with Alkyl Polysulfides: Comparison with Conventional Sulfiding	J. van Gestel, J. Leglise, and J.-C. Duchet	**429**
Deactivation of Steam-Reforming Model Catalysts by Coke Formation. II. Promotion with Potassium and Effect of Water	Mario C. Demicheli, D. Duprez, J. Barbier, O. A. Ferretti, and E. N. Ponzi	**437**
Stabilized Aluminum Oxide Prepared by Heat Treatment of Aluminum Hydroxide Sols in a Carbon Matrix	Z. Jaworska-Galas, W. Mista, J. Wrzyszcz, M. Zawadzki, and J. Machnikowski	**450**
Effect of Ga/Proton Balance in Ga/HZSM-5 Catalysts on C_3 Conversion to Aromatics	B. S. Kwak and W. M. H. Sachtler	**456**
Chromia Supported on Titania. III. Structure and Spectroscopic Properties	U. Scharf, H. Schneider, A. Baiker, and A. Wokaun	**464**
Effects of Altervalent Cation Doping of TiO_2 on H_2 and CO Adsorption on Supported Rh	Theophilos Ioannides and Xenophon E. Verykios	**479**
Effects of Altervalent Cation Doping of TiO_2 on Kinetic Parameters of CO Hydrogenation and CO Oxidation on Supported Rh	T. Ioannides, X. E. Verykios, M. Tsapatsis, and C. Economou	**491**
Field Emission Microscopy Study of Supported Bimetallic Catalysts Pd–Mo/Al_2O_3/W: Nitrogen Spillover	Jan Šotola and Zlatko Knor	**501**
Kinetics of CO Oxidation on Cu/Rh(100) Model Bimetallic Catalysts	Janos Szanyi and D. Wayne Goodman	**508**
ZrO_2-Promoted Rh/SiO_2 Catalysts in CO Hydrogenation and Temperature-Programmed Reduction	A. L. Borer, B. Brönnimann, and R. Prins	**516**
Solid Electrolyte Aided Study of the Oxidation of Hydrogen on Copper and Copper Oxide Catalysts	Arthur Balïan, George Hatzigiannis, Douglas Eng, and Michael Stoukides	**526**
Reaction Pathway of Formation of Methoxysilanes in the Reaction of Silicon with Methanol Catalyzed by Copper(I) Chloride	Masaki Okamoto, Eiichi Suzuki, and Yoshio Ono	**537**
Infrared Study of Coke on Alumina and Zeolite	J. Datka, Z. Sarbak, and R. P. Eischens	**544**
Kinetic Studies of the Isomerization of *n*-Butenes over Boroaluminosilicate Zeolites	Daniel Bianchi, Mark W. Simon, Sang Sung Nam, Wen-qing Xu, Steven L. Suib, and Chi-Lin O'Young	**551**
The State of Platinum in Pt on Sulfated Zirconia Superacid Catalysts	Abdelhamid Sayari and Awa Dicko	**561**
Interaction of Titanium Isopropoxide with Surface Hydroxyls on Silica	S. Srinivasan, A. K. Datye, M. H. Smith, and C. H. F. Peden	**565**
Note		
Transformation of Some Light Mono- and Dialkylbenzenes on H-ZSM-5	J. Engelhardt	**574**
Author Index for Volume 145		**578**

NOTICE

The Subject Index for Volume 145 will appear in the December 1994 issue as part of a cumulative index for the year 1994.

JOURNAL OF CATALYSIS

INFORMATION FOR AUTHORS

The ***Journal of Catalysis*** publishes articles dealing with original studies in heterogeneous and homogeneous catalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of surfaces, and engineering studies related to catalysis. All articles will be published in English.

Submission of Manuscripts. Manuscripts should be sent by registered mail to either of the Editors:

Professor W. Nicholas Delgass
c/o ***Journal of Catalysis***
Editorial Office
Suite 1900
525 B Street
San Diego, California 92101-4495
Telephone: (619) 699-6469
Fax: (619) 699-6859

or

Professor Frank S. Stone
School of Chemistry
University of Bath
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the ***Journal of Catalysis*** represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. Submit manuscript (in English) in quadruplicate, including the original typewritten copy, with copies of all figures and tables. Originals of micrographs should also be submitted in quadruplicate for purposes of manuscript reviewing. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-in. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not exceeding 55 letters and spaces, and the name and complete mailing address (also telephone and fax numbers and e-mail address, if possible) of the person to whom proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

If the manuscript refers to recently submitted manuscripts or papers in press (with the ***Journal of Catalysis*** or other journals) then please supply three copies of them so that the reviewers can judge the new manuscript in its proper context.

Revised manuscripts should be returned with one copy marked to show where changes have been made.

Notes and **Letters to the Editor** may not exceed 8 double-spaced typewritten manuscript pages (including tables and figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must be related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on any topic, no more than one Letter from each author will be accepted.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Systeme International) system of units will be accepted without editorial change. Authors using other units are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures are quoted in Torr to write "1 Torr = 133.3 N m^{-2}." For information concerning SI units, see *Quantities, Units and Symbols for Physical Chemistry,* 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 1988.

Footnotes should be avoided if possible; but if essential, they should be designated by superscript Arabic numerals (starting with title) in the text.

Tables should be numbered with Arabic numerals in order of mention in the text. They should be typed double-spaced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the table. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

Figures should be numbered with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be in finished form suitable for reproduction. They should be planned to fit the proportion of the printed page ($7\frac{1}{8}$ × 9 in.; column width, 3.5 in.). No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough

(10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest structures and structural formulas must be designed for direct reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Electron micrographs. Please supply four photographic copies of these so that the reviewers can inspect the fine details they contain.

References to the literature should be cited in the text by Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in the latest *Chemical Abstracts' Service Source Index*. Style and punctuation of references should be in accordance with the following examples:

1. Zhang, X., Jefferson, D. A., and Lambert, R. M., *J. Catal.* **141,** 583 (1993).
2. Louis, C., and Che, M., *in* "Reactivity of Solids" (P. Barret and L. C. Dufour, Eds.), Vol. B, p. 1057. Elsevier, Amsterdam, 1985.
3. Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

Proofs. Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.

Personal Computer Disks. Manuscripts may be submitted to the ***Journal of Catalysis*** on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Please supply the file as a straight ASCII file with generic codes specified by the publisher. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular and mathematical material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion and a list of generic codes, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).
